

HARRY ELLIOTT

SENIOR USER EXPERIENCE DESIGNER

Senior UX designer with 20 years of experience designing complex digital products across financial services and automotive shopping tools. Experienced in customer-facing sales and decision flows as well as legacy platform modernization. Advanced Figma practitioner skilled in components, auto layout, prototyping and clean design-to-development handoff. Trusted cross-functional partner to product owners, engineering, analytics, legal, compliance, information security and leadership teams.

SOFTWARE SKILLS

- Claude Code
- Figma
- Adobe Creative Cloud (Photoshop and XD)
- Adobe Experience Manager (component, template and page-building development)
- Atlassian Confluence

FRONT-END DEVELOPMENT SKILLS

- **Architecture:** Responsive and mobile-first design.
- **Design Systems:** Design tokens and reusable component libraries to ensure cross-platform consistency.
- **Technical Proficiency:** Advanced CSS3, SASS and JavaScript integration.
- **Security:** Development within the strictest security and privacy protocols.
- **Version Control:** Collaborative development using Git and GitHub.

WORK EXPERIENCE

SENIOR WEB CONSULTANT

TransUnion, LLC · 2013 – 2025

Chicago, Illinois

HIGHLIGHTS

- **Customer-facing design:** Designed and modernized complex financial services interfaces supporting credit data, account workflows and customer-facing tools in highly regulated environment.
- **Figma design systems and UI Toolbox:** Helped build and maintain the UI Toolbox, an interactive corporate design system and reusable Figma-based component library used across multiple business verticals, supporting consistency, faster iteration, shared interface patterns and clean handoff to engineering.
- **Legacy platform modernization:** Redesigned high-complexity credit data and administrative tools into responsive interfaces, removing friction points that previously hindered task completion while upgrading design and UX.
- **Cross-functional alignment:** Ran rapid wireframing and prototyping on data-rich fintech initiatives, pulling legal, compliance and information security teams in earlier rather than later, where the costly rework happens.
- **Design-to-development handoff:** Built long-running partnerships with development teams, delivering production-ready HTML, CSS and SASS.
- **Executive communication:** Presented research and design rationale to senior leadership in plain language to achieve buy-in without compromising user needs.
- **Mentorship & team development:** Managed and mentored junior designers and a diverse team of high school seniors (through GenesysWorks) without slowing agile delivery.

EDUCATION

BACHELOR OF JOURNALISM

Concentration in Advertising
University of Missouri 
Columbia, Missouri Mizzou

PROFESSIONAL INTERESTS

- UX and usability of AI-driven tools
- Stitch
- Responsible and human-centered AI
- Privacy-first design protecting users from exploitation
- Ethical design and the avoidance of dark patterns
- Elegant, purposeful typography and type design
- Creative and nonfiction writing

ADDITIONAL WORK EXPERIENCE

WEB CONSULTANT

TransUnion, LLC · 2007 – 2013
Chicago, Illinois

HIGHLIGHTS

- **Credit report redesign:** Served as subject matter expert for the migration of legacy, text-only "Print Image" credit reports into an optimized, scannable PDF format that met corporate brand standards. The user base embraced the upgrade.
- **B2B platform rebuild:** Led design for the comprehensive re-architecture of TransUnion Direct, the B2B portal serving small lenders, property managers and small businesses. The modernized interface became the technical foundation for dozens of subsequent releases.
- **Long-running product work:** Handled multi-year maintenance and feature development across TransUnion's primary B2B platforms. Consistent performance on these upgrades led to promotion to Senior Web Consultant.
- **Global team coordination:** Refined workflows with India-based development teams, closing communication gaps across time zones and shortening development cycles.

RESEARCH PRODUCER

Cars.com · 2003 – 2007
Chicago, Illinois

HIGHLIGHTS

- **Research-driven design practice:** Led the shift to research-driven design across the Research and Reviews channel, replacing guesswork with iterative testing and prototyping so products were built on validated user needs.
- **Customer-facing shopping experiences:** Directed UX and front-end development for first-generation automotive shopping tools including Side-by-Side Car Compare, New Car Configurator and Advanced Features Search, helping consumers evaluate options, compare features and move through high-consideration purchase decisions.
