

HARRY ELLIOTT

SENIOR USER EXPERIENCE DESIGNER

Senior UX designer with more than 20 years untangling complex enterprise systems across financial services and consumer auto tools. Specializing in legacy platform modernization, scalable design systems and interfaces that make important tasks clearer for users and easier for teams to build. Trusted cross-functional partner. Recently rebuilt a corporate design system in React and Storybook, then extended it with a machine-readable layer that lets AI agents query it directly.

SOFTWARE SKILLS

- Claude Code
- Codex
- Google Antigravity
- Figma
- Adobe Creative Cloud (especially Photoshop)
- Adobe Experience Manager
- Atlassian Confluence

FRONT-END DEVELOPMENT SKILLS

- **Architecture:** Responsive and mobile-first design.
- **Design Systems:** Design tokens and reusable component libraries to ensure cross-platform consistency.
- **Technical Proficiency:** Advanced CSS3, SASS and JavaScript integration.
- **Security:** Development within the strictest security and privacy protocols.
- **Version Control:** Collaborative development using Git and GitHub.

WORK EXPERIENCE

SENIOR WEB CONSULTANT

TransUnion, LLC · 2012 – 2025

Chicago, Illinois

HIGHLIGHTS

- **Customer-facing design:** Designed and modernized complex financial services interfaces supporting credit data, account workflows and customer-facing tools in a highly regulated environment.
- **Figma design systems and UI Toolbox:** Helped build and maintain the UI Toolbox, an interactive corporate design system and reusable Figma-based component library used across multiple business verticals, supporting consistency, faster iteration, shared interface patterns and clean handoff to engineering.
- **Legacy platform modernization:** Redesigned high-complexity credit data and administrative tools into responsive interfaces, removing friction points that previously hindered task completion while upgrading design and UX.
- **Cross-functional alignment:** Ran rapid wireframing and prototyping on data-rich fintech initiatives, pulling legal, compliance and information security teams in earlier rather than later, where the costly rework happens.
- **Design-to-development handoff:** Built long-running partnerships with development teams, delivering production-ready HTML, CSS and SASS.
- **Executive communication:** Presented research and design rationale to senior leadership in plain language to achieve buy-in without compromising user needs.
- **Mentorship and team development:** Managed and mentored junior designers and a diverse team of high school seniors (through Genesys Works) without slowing agile delivery.

EDUCATION

BACHELOR OF JOURNALISM

Concentration in Advertising
University of Missouri 
Columbia, Missouri Mizzou

PROFESSIONAL INTERESTS

- UX and usability of AI-driven tools
- Stitch
- Responsible and human-centered AI
- Privacy-first design protecting users from exploitation
- Ethical design and the avoidance of dark patterns
- Elegant, purposeful typography and type design
- Creative and nonfiction writing

ADDITIONAL WORK EXPERIENCE

WEB CONSULTANT

TransUnion, LLC · 2007 – 2012
Chicago, Illinois

HIGHLIGHTS

- **Credit report redesign:** Served as subject matter expert for the migration of legacy, text-only "Print Image" credit reports into an optimized, scannable PDF format that met corporate brand standards. The user base embraced the upgrade.
- **B2B platform rebuild:** Led design for the comprehensive re-architecture of TransUnion Direct, the B2B portal serving small lenders, property managers and small businesses. The modernized interface became the technical foundation for dozens of subsequent releases.
- **Long-running product work:** Handled multiyear maintenance and feature development across TransUnion's primary B2B platforms. Consistent performance on these upgrades led to promotion to Senior Web Consultant.
- **Global team coordination:** Refined workflows with India-based development teams, closing communication gaps across time zones and shortening development cycles.

RESEARCH PRODUCER

Cars.com · 2004 – 2007
Chicago, Illinois

HIGHLIGHTS

- **Research-driven design practice:** Led the shift to research-driven design across the Research and Reviews channel, replacing guesswork with iterative testing and prototyping so products were built on validated user needs.
- **Customer-facing shopping experiences:** Directed UX and front-end development for first-generation automotive shopping tools including Side-by-Side Car Compare, New Car Configurator and Advanced Features Search, helping consumers evaluate options, compare features and move through high-consideration purchase decisions.
